

# Gomco<sup>®</sup> Suction Equipment

For more than 75 years, Gomco<sup>®</sup> has been a leading designer and manufacturer of suction equipment.

Gomco suction equipment is known throughout the world for its unparalleled quality and durability.

As in the past, each and every Gomco aspirator is designed and manufactured in the United States.

**MADE IN USA**

# Gomco Aspirator Line Introduction

---

Gomco aspirators are used in hospitals, clinics, private practice, EMS and homecare. Our aspirators come in four distinct platforms:

- AC/DC Portable** Lightweight, battery-powered aspirators that can be used wherever the patient is. Ideal for hospitals and EMS.
- Tabletop Portable** Lightweight, AC-powered aspirators designed for daily use. Ideal for Clinics, private practice, and homecare.
- Stand-Mounted** Robust, AC-powered aspirators designed for daily extended use. Ideal for hospitals and clinics.
- Cart-Mounted** Heavy-duty, surgical-style aspirators designed for the rigors of continuous operating room use.

The product line can be further differentiated according to the aspirator's clinical application. Gomco aspirators have been designed for the following applications:

- General Use** General use aspirators are designed to perform a wide range of suction procedures, including but not limited to pharyngeal, nasopharyngeal, and tracheal aspiration.
- High-Flow General Use** High-flow general use aspirators provide meet the same suction needs as general use aspirators, but feature more powerful pumps capable of higher flows and vacuum levels.
- Gastric Drainage** Gastric drainage aspirators remove fluids from the stomach and the gastrointestinal (GI) tract (large and small intestines). Mild, intermittent suction is used to mitigate the risk of damaging the delicate tissues of the stomach and GI tract.
- Gastric Drainage & General Use Combination** These models feature selectable modes which allow the pump to be switched from continuous flow to intermittent flow. These pumps can be used for both gastric drainage and general use.
- Thoracic Drainage** Thoracic drainage aspirators remove air and fluids from the thorax (chest) to restore vacuum to the pleural cavity (space between the lungs and the chest wall) or for post-operative drainage. Gentle suction is used to prevent damaging the patient's lungs.
- Surgical Suction** Surgical suction devices are use high flowrates and vacuum levels to remove irrigation so the surgeon can work clearly. Surgical suction can also be used to remove specimens and tissues during operation.
- Uterine Suction** Uterine suction are surgical suction devices specifically designed for D&C procedures.
- Dental Suction** Dental units are specialized for dental and ear, nose and throat (ENT) applications in clinics and physician's offices. It's unique design incorporates an aspirator and air compressor in one.

# Gomco Aspirator Identification Matrix

Application	Platform				Vacuum Pressure Range	Flow Rate at Open Flow	Page
	AC/DC Portable	Tabletop Portable	Stand Mounted	Cart Mounted			
General Use	G180				-25 to -550 mmHg	> 30 LPM	3
		305			-25 to -550 mmHg	> 30 LPM	5
		300			-25 to -559 mmHg	29 LPM	6
			3020, 3021		-25 to -559 mmHg	26 LPM	7
High-Flow General Use		405			-80 to -635 mmHg	40 LPM	9

# AC/DC Portable, **Gomco OptiVac**<sup>®</sup> Model G180

**G180**

The Gomco OptiVac is an AC/DC general use portable aspirator. This aspirator generates up to -550 mm Hg of vacuum pressure and a flow rate in excess of 30 lpm at open flow. The rugged go-anywhere capability of the OptiVac makes it perfectly suited to handle emergency situations.

### **Key Features**

- 3 hours run time at maximum vacuum on a fully-charged battery
- 1 hour run time after just 2 hours of charging
- Will run at full performance on AC power even with a depleted battery
- Battery maintenance system keeps the battery fully charged but not over-charged
- Sealed water-resistant unit is easy to clean and minimizes potential contamination or damage to the pump and battery

# AC/DC Portable, **Gomco OptiVac®** Model G180

## Specifications

Vacuum Range:	-25 to -550 mm Hg
Flow Rate:	Greater than 30 lpm at open flow
Sound Level:	Less than 60 dBA
Pump Type:	Oil-less diaphragm
AC Operation:	110-230 volts, 50/60 Hz
DC Operation:	12 volt DC battery
Battery Type:	Sealed lead acid
Battery Life at Maximum Vacuum:	3 hours at 550 mm Hg
Battery Charge Time:	Full charge in 8 hours
Battery Charge Status:	Yes; 5 indicator lights
Bad Battery Sensor:	Yes; 5 red LEDs
Battery Depleted:	Unit automatically shuts off
AC Charger:	Internal charger
Operation with Depleted Battery:	Yes; charging circuit can run on AC if battery is depleted
Operating Temperature:	-4°F to 120°F
Dimensions:	16.8" W x 7.5" D x 9.4" H (427 mm x 191 mm x 239 mm)
Weight:	11.4 lbs. (5.18 kg)
ETL Listed:	Yes
Warranty:	3 years on unit, 1 year on battery
Regulatory Approvals:	FDA, CE, HC

# Tabletop Portable Model 305

The Gomco 305 is a general use tabletop aspirator for hospitals, clinics, and physician's offices. It generates up to -550 mm Hg of vacuum pressure and a greater than 30 lpm flow rate at open flow.

## Key Features

- Maintenance-free and oil-free diaphragm pump ensures maximum reliability
- Easy to store, the 305 takes up less than one square foot of space
- Enclosed pump design
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

**01-22-3005**

## Specifications

Vacuum Range:	-25 to -550 mm Hg
Flow Rate:	Greater than 30 lpm at open flow
Sound Level:	Less than 60 dBA
Pump Type:	Oil-less diaphragm
Electrical Cord:	6' hospital grade
Dimensions:	16.8" W x 7.5" D x 9.4" H (427 x 191 x 239 mm)
Weight:	9.8 lbs. (4.4 kg)
ETL Listed:	Yes
Warranty:	3 years
Regulatory Approvals:	FDA, HC

# Tabletop Portable Model 300

The Gomco 300 is a heavy duty general use tabletop aspirator for hospitals, clinics and physician's offices. It generates up to -559 mm Hg of vacuum pressure and a 29 lpm flow rate at open flow.

## Key Features

- Maintenance-free and oil-free diaphragm pump ensures maximum reliability
- Similar performance and quality of a mobile aspirator in a tabletop design
- Easy to store, the 300 takes up less than one square foot of space
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

**01-22-0300**

## Specifications

Vacuum Range:	-25 to -559 mm Hg
Flow Rate:	29 lpm at open flow
Sound Level:	Less than 60 dBA
Pump Type:	Oil-less diaphragm
Electrical Cord:	6' hospital grade
Dimensions:	13" W x 9" D x 12" H (30 x 23 x 30 cm)
Weight:	19 lbs. (9 kg)
UL/ETL Listed:	No
Warranty:	1 year
Regulatory Approvals:	FDA, HC

Additional case quantities are available.  
Collection bottles are shown on page 23.  
Suction accessories are shown on page 24 and 25.*

# Stand-Mounted Models 3020, 3040

**01-62-3021**

**01-62-3040**

General Use

The Gomco 3020 and 3040 are general use aspirators. Each model generates up to -559 mm Hg of vacuum pressure and a 26 lpm flow rate at open flow. The Gomco 3020 comes with a 600 ml or an 1100 ml collection unit and is ideal for clinics, whereas the Gomco 3040 has a high capacity 2200 ml or 2800 ml collection unit and is better suited for hospitals.

## Key Features

- Maintenance-free and oil-free diaphragm pump ensures maximum reliability
- Easy-to-store and transport compact design with a flat stainless steel top
- Convenient storage for a 6' hospital grade electrical cord
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

# Stand-Mounted Models 3020, 3040

## Specifications

Vacuum Range: -25 to -559 mm Hg  
 Flow Rate: 26 lpm at open flow  
 Sound Level: Less than 52 dBA  
 Pump Type: Oil-less diaphragm  
 Electrical Cord: 6' hospital grade  
 Dimensions: 18" W x 17" D x 33" H  
 (46 x 43 x 84 cm)  
 Weight: 52 lbs. (24 kg)

# Tabletop Portable Model 405

The Gomco 405 is a high performance general use tabletop aspirator for hospitals, clinics and physician's offices. It generates up to -635 mm Hg of vacuum pressure and a 40 lpm flow rate at open flow.

## Key Features

- Powerful rotary vane pump excels at pharyngeal and nasopharyngeal procedures
- Easy to store, the 405 takes up less than one square foot of space
- Self-contained unit provides protection against pump and gauge contamination, and allows for easy clean-up
- Low maintenance requirements
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

**01-12-4005**

## Specifications

### Vacuum Range:

01-12 Models: -80 to -635 mm Hg

01-23 Model: -25 to -555 mm Hg

### Flow Rate:

01-12 Models: 40 lpm at open flow

01-23 Model: 25 lpm at open flow

# Tabletop Portable Model 270

01-22-0270

The Gomco 270 is a tabletop gastric drainage aspirator for hospitals, clinics and home care. It has two pre-set drainage levels - 90mm Hg and 120 mm Hg - with 0.25 lpm and 0.3 lpm respective flow rates.

## Key Features

- Silent operation due to a Gomco exclusive thermotic pump design
- Compact, easy to store design takes up about one-half square feet of space for bedside use
- Floor bottle basket for stability with either bottle or canister
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

## Specifications

Vacuum Setting:	-90 mm Hg or -120 mm Hg
Flow Rate:	0.25 lpm @ -90 mm Hg and 0.3 @ -120 mm Hg
Sound Level:	Less than 47 dBA
Pump Type:	Thermotic
Electrical Cord:	6' hospital grade
Dimensions:	12" W x 8" D x 11" H (30 x 20 x 28 cm)
Weight:	10 lbs. (5 kg)
UL/ETL Listed:	No
Warranty:	1 year
Regulatory Approvals:	FDA, HC

Additional case quantities are available.  
Collection bottles are shown on page 23.  
Suction accessories are shown on page 24 and 25.*

# Stand-Mounted Models 6000, 6010

Gomco 6000 and 6010 are mobile aspirators which specialize in gastric drainage for hospitals and clinics. Both models have two pre-set drainage levels of -90 mm Hg and -120 mm Hg with 0.25 and 0.3 lpm respective flow rates. The Gomco 6010 features an integrated drainage tube flushing mechanism, whereas the Gomco 6000 does not.

## Key Features

- Silent operation due to a Gomco exclusive thermotic pump design
- Easy-to-store and transport compact design with a flat stainless steel top
- Convenient storage for 6' electrical cord with hospital-grade plug
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

## Specifications

Vacuum Setting:	-90 mm Hg or -120 mm Hg

# Stand-Mounted Models 6036, 6037

01-62-6036

Gomco 6036 and 6037 are mobile aspirators which specialize in gastric drainage for hospitals and clinics. Both models generate up to -250 mm Hg for constant suction and up to -200 mm Hg for intermittent suction, with a 20 lpm and 3-4 lpm respective flow rates at open flow. The Gomco 6036 comes with reusable collection bottle, whereas the Gomco 6037 comes with disposable collection canisters.

## Key Features

- Fully independent constant and intermittent modes; each mode has it's own collection system (collection unit and suction tubing)
- Adjustable suction timing allows the clinician to tailor treatment to fit individual patients
- Easy-to-store and transport compact design with a flat stainless steel top
- Convenient storage for 6' electrical cord with hospital-grade plug
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

# Stand-Mounted Models 6036, 6037

## Specifications

### Vacuum Range:

Constant: -25 to -250 mm Hg  
 Intermittent: -25 to -200 mm Hg

### Flow Rate:

Constant: 20 lpm at open flow  
 Intermittent: 3-4 lpm at open flow

### Cycle Times:

ON: 5-90 seconds, adjustable  
 OFF: 12 seconds, fixed

### Sound Level:

Less than 52 dBA

### Pump Type:

Oil-less diaphragm

### Electrical Cord:

6' hospital grade

### Dimensions:

23" W x 17" D x 33" H  
 (109 x 43 x 84 cm)

### Weight:

62 lbs. (28 kg)

### UL Listed:

115V/60 Hz

### Warranty:

1 year

### Regulatory Approval:

FDA HC (model 6036 only)

# Stand-Mounted Model 6020

The Gomco 6020 is a mobile aspirator which is specialized for thoracic drainage for hospitals. It generates up to -25 cm H<sub>2</sub>O of vacuum pressure with a 2.3 lpm flow rate at open flow.

## Key Features

- Silent operation due to a Gomco exclusive thermotic pump design
- Water seal in the collection bottle prevents aspirated air from re-entering the chest
- Easy-to-store and transport compact design with a flat stainless steel top
- Convenient storage for 6' electrical cord with hospital-grade plug
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

## Specifications

Vacuum Range:	0 to -25 cm H <sub>2</sub> O (0 to -18.4 mm Hg)
Flow Rate:	2.3 lpm (minimum) at open flow
Sound Level:	Less than 47 dBA
Pump Type:	Thermotic
Electrical Cord:	6' hospital grade
Dimensions:	18" W x 17" D x 33" H (46 x 43 x 84 cm)
Weight:	52 lbs. (24 kg)
UL Listed:	Yes
Warranty:	1 year
Regulatory Approvals:	FDA, HC

# Stand-Mounted Model 6050

The Gomco 6050 is a high performance mobile aspirator specialized for emergency thoracic drainage in hospitals. It generates up to -50 cm H<sub>2</sub>O of vacuum pressure with a 110 lpm flow rate at open flow.

## Key Features

- Used in emergency situations where vacuum must be quickly restored to the pleural cavity
- Two drainage tubes allow for fluids and air to be removed simultaneously
- Water seal in the collection bottle prevents aspirated air from re-entering the chest
- Easy-to-store and transport compact design with a flat stainless steel top
- Convenient storage for 6' electrical cord with hospital-grade plug

## Specifications

Vacuum Range:	0 to -50 cm H <sub>2</sub> O (0 to -36.8 mm Hg)
Flow Rate:	110 lpm at open flow
Sound Level:	Less than 64 dBA
Pump Type:	Turbine
Electrical Cord:	6' hospital grade
Dimensions:	18" W x 17" D x 33" H (46 x 43 x 84 cm)

# Cart-Mounted Models 3910, 3940

Gomco 3910 and 3940 are heavy duty, high performance mobile aspirators engineered for surgical suites. Both models generate up to -635 mm Hg of vacuum pressure and a 34 lpm flow rate at open flow. The Gomco 3910 comes with one reusable collection bottle, and the Gomco 3940 comes with two selectable collection bottles for extended use.

## Key Features

- Maximum reliability thanks to the robust, maintenance-free and oil-free diaphragm pump design
- Stable, heavy duty cart design with flat stainless steel sides and top
- Mechanical shut-off float helps prevent fluid contamination
- Convenient storage drawer for suction accessories

## Specifications

Vacuum Range:	-25 to -635 mm Hg
Flow Rate:	34 lpm at open flow
Sound Level:	Less than 54 dBA
Pump Type:	Oil-less belt-driven diaphragm
Electrical Cord:	6' hospital grade
Dimensions:	20" W x 15" D x 32" H (50 x 38 x 80 cm)
Weight:	110 lbs. (50 kg)
UL/ETL Listed:	No
Warranty:	1 year

Additional case quantities are available.  
Collection bottles are shown on page 23.  
Suction accessories are shown on page 24 and 25.

**Explosion-proof models 3810 and 3840 are also available.**  
**Explosion-proof models MUST use conductive tubing item # 01-90-3560, in lieu of bacteria filters.**  
For ordering information, please contact your Allied Healthcare Sales Representative or Customer Service.

# Cart-Mounted Model 3930

The Gomco 3930 is a heavy duty, high performance mobile aspirators specialized for dilation and curettage (D&C). This model generates up to -635 mm Hg of vacuum pressure.

## Key Features

- Two 600 ml glass collection bottles with a specimen collection bag
- Comes with four reusable curettes (unless otherwise noted)
- Chemical-resistant easy to clean stainless steel top
- Convenient storage for cord with hospital-grade electrical plug

## Specifications

# Tabletop Portable Model 309

The Gomco 309 is a tabletop aspirator specialized for dental and ear, nose and throat (ENT) applications in clinics and physician's offices. It's unique design incorporates an aspirator and air compressor in one, compact unit. As an aspirator it generates up to -559 mm Hg of vacuum pressure and a 29 lpm flow rate at open flow, and as an air compressor it generates up to 50 psi of pressure.

## Key Features

- Maintenance-free and oil-free diaphragm compressor ensures maximum reliability
- Easy to store, the unit takes up less than one square foot of space
- Disposable hydrophobic bacteria filter helps prevent fluid and aerosol contamination

01-22-0309

## Specifications

Vacuum Range:	-25 to -559 mm Hg
Pressure Range:	2 to 50 psi
Flow Rate:	29 lpm at open flow
Sound Level:	Less than 60 dBA

# Gomco® Disposable Collection Canisters

**01-90-3695**  
1100 ml Canister

**01-90-3711**  
2100 ml Canister

## Disposable Collection Canisters

- Accurate easy-to-read calibrations and an enlarged area in which to write patient information
- Critical care measurements on the 1100 ml canister
- Flexible lid creates an airtight seal, making it ideal even for low vacuum applications ... seals with a “snap”
- Designed for minimal restriction to flow for enhanced performance of the vacuum pump
- Horizontal, removable patient tubing inlet helps to prevent tubing occlusion
- Large pour spout can serve as an accessory port when specimen collection is required
- Plugs and caps for all ports to make the canister a closed system
- Labeled vacuum and patient ports
- Integrated hydrophobic filter shut-off system automatically shuts off suction as fluids arrive near the top of the canister; when fluids or foam reach the filter, the canister will discontinue filling and will be leak-tight for final disposal
- Hydrophobic filter also incorporates a pre-filter designed for use with laser surgery

# Allied® Disposable Collection Canisters

Integrated cellulose bacteria/overflow filter eliminates the need for a separate filter.

## Disposable Collection Canisters

- Accurate easy to read calibrations and an enlarged area in which to write patient information
- The snap-on lid is easy to attach to the canister and virtually impossible to remove
- Audible “snap” gives clear confirmation that the lid is properly sealed and secure
- Hydrophobic filter self-sealing material improves flow 20%
- When the filter comes into contact with moisture, it immediately stops flow from the patient and prevents fluids from entering the system
- Built-in tubing hooks in the lid eliminate the need to coil up excess tubing, preventing kinks and occlusions
- Caps for all ports are attached to the lid for convenience in sealing the canister after use

Cap & Float  
Assembly

## Clear Polycarbonate and Glass Collection Bottles

- Reusable ... steam sterilizable (autoclavable)
- Clear bottles allow visual inspection of fluid level, color and consistency
- Adapt to all standard hospital piping systems
- Positive shut-off cap & float assembly interrupts suction to help prevent fluid carryover into pump
- Cap and float assembly includes a hospital patient port to help prevent kinking of suction tubing, and a hose stem vacuum inlet
- Half-gallon (1200 ml) bottle is calibrated 200 ml to 1200 ml, for estimating purposes only; the float shuts off at approximately 850 ml
- One gallon (2800 ml) bottle is calibrated 800 ml to 2800 ml for estimating purposes only; the float shuts off at approximately 2600 ml

# Bacteria Filters & Tubing

## Disposable Hydrophobic Bacteria Filters

- Provides high flow while blocking aqueous fluids and aerosol contaminants
- 99.97% D.O.P. retention (0.3 micron particles in air) filter efficiency provides superb protection against bacteria
- Provides excellent protection against bacteria for personnel who come into contact with the suction system
- Can be used with virtually any portable suction system
- Model 3100 barb to 1/8" NPT thread is installed on all Gomco aspirators (except the G180 and 305) by simply screwing the threaded end into the vacuum and filter connection
- Barbed portion of filters accepts 1/4" to 1/2" ID flexible tubing

# Chemetron<sup>®</sup> Vacutron<sup>®</sup> Suction Regulators

In addition to the industry-leading Gomco<sup>®</sup> line of portable and mobile suction equipment, since 1985 Allied Healthcare has been improving patient care with easy-to-use suction regulators carrying the Chemetron Vacutron brand name.

The Vacutron suction regulator provides the best technology in a space-saving responsive instrument that fits into any surrounding and delivers superior results.

Vacutron suction regulators are available in eight models and can be ordered with a wide variety of inlet and outlet fittings, as well as color-coded knobs.

## More Allied Innovations

Allied really *does* have it all under one roof. We have shown you our Gomco® line of suction equipment ... but that's just a part of the complete offering of products and repair parts for home health care, long term care, medical centers and hospitals:

- Flowmeters
- Suction Regulators
- Bag Valve Mask Resuscitators
- CO<sub>2</sub> Absorbents
- Portable Air Compressors

Contact your Allied Healthcare Products sales representative or call 800-444-3940 to speak with our expert Customer Service staff for complete information.
